

Managed Public Cloud

Leveraging the scale, efficiency and power of public cloud services such as Amazon Web Services (AWS), Google Cloud and Microsoft Azure is an enticing proposition.

A lack of in-house expertise can present significant challenges to a successful public cloud implementation, so by partnering with us, we can help support you on your cloud journey and give you the management control you require to ensure your experience is a good one and that you enjoy a positive return on your investment.

Our team of engineers will work with you to design, build and then support the highly-available, public cloud architecture needed to meet your business goals.

You will benefit from all of the advantages of the public cloud, while also enjoy access to an expert team who will be able to support your security and compliance, as well as monitor and manage your environment.

The public cloud is perfect for functions such as:

- ✧ Web servers.
- ✧ Development and testing environments.
- ✧ Backup and disaster recovery.
- ✧ Application servers.
- ✧ Database hosting.
- ✧ Batch processing.
- ✧ Media streaming.

Cardonet will give you access to an experienced team of engineers who can support you on your public cloud journey and ensure that you get a flexible solution that meets your organisational needs.

Managed Public Cloud Benefits

-  **The public cloud is a cost-effective IT infrastructure model.**

Only pay for the resources you use to run your business, while benefitting from improved performance, lower capital expenditure costs and lower hardware and data centre management costs.
-  **You can more easily adapt to changing business and market demands.**

The public cloud offers you a tremendous amount of flexibility to increase or decrease your usage as demands dictate. That also allows you to innovate, test and experiment more easily without having to invest in and support dedicated infrastructure.
-  **Your infrastructure estate is a lot simpler.**

You have complete control. You can quickly create a single server instance or carry out a full infrastructure rollout from a single control panel. Billing is also simple, with hourly or monthly billing for resource usage for each machine.
-  **With a managed service, you enjoy the benefits of the public cloud with added support, security and management from a team of experts.**

We have a great deal of experience working in public cloud environments. We have the skills that you need to help you on your cloud journey, from identification to design, build and support.

Discover whether the **public cloud** is right for your business.

Our experienced engineers are on hand to make your journey to the cloud a seamless one.

Discuss your Managed Public Cloud needs by calling us on +44 203 034 2244 or +1 323 984 8908, or emailing hello@cardonet.com

Our Technology Partners
