Cyber Essentials Support

It is critical that you maintain a strong cyber security strategy, especially with advancements in technology and the ever-changing threat landscape.

The Cyber Essentials scheme is a government-backed cyber security standard that you can assess and certify yourself against in order to ensure that you are addressing cyber security effectively and mitigating the risk of threats.

Although relatively basic, getting Cyber Essentials accredited will demonstrate that you have essential levels of protection in your business.

With our Cyber Essentials Support service, we will analyse your cloud and on-premise IT Infrastructure to ensure that you can achieve Cyber Essentials certification.

Cyber-attacks on businesses, both large and small, are a regular occurrence of daily life. By becoming Cyber Essential certified, you will be taking the important first steps needed to prevent becoming a statistic.

We will assess the following:

- ✧ Secure boundary firewalls.
- ✧ Effective malware protection.
- ✧ Secure system configuration.
- ✧ Regular patch management.
- ✧ Effective user access controls.

Cyber Essentials Support Benefits

-  **Cyber Essentials certification will help protect your organisation against common cyber threats.**

You can mitigate the likelihood of suffering a serious cyber-attack, resulting in the potential loss of valuable corporate data. By complying with Cyber Essentials, you will be protecting yourself from at least 80% of common cyber threats.
-  **Improve your team's awareness and understanding of cyber-security.**

By becoming compliant, you are provided with an excellent opportunity to raise the awareness of cyber-security within your business, which in itself is a major barrier to multiple threats such as phishing. You can also then demonstrate to your key stakeholders that you take your data and cyber security seriously.
-  **You can become Cyber Essentials certified easier and faster.**

With support from a team of experienced cyber-security experts, you will be able to get your cyber-essentials accreditation a lot faster than if you carried out the work yourself. We know the rules and regulations and understand how they apply in a business environment.
-  **Meet eligibility requirements for certain government and MOD supply chain contracts.**

This doesn't apply to all businesses, but with Cyber Essentials accreditation, you will be able to apply to work with various departments of government.

Discover how we can help you become **Cyber Essentials** certified.

Our experienced cyber-security team will make the process easy.

Discuss your Cyber Essentials needs by calling us on +44 203 034 2244 or +1 323 984 8908, or emailing hello@cardonet.com
